**CARBONLITE**

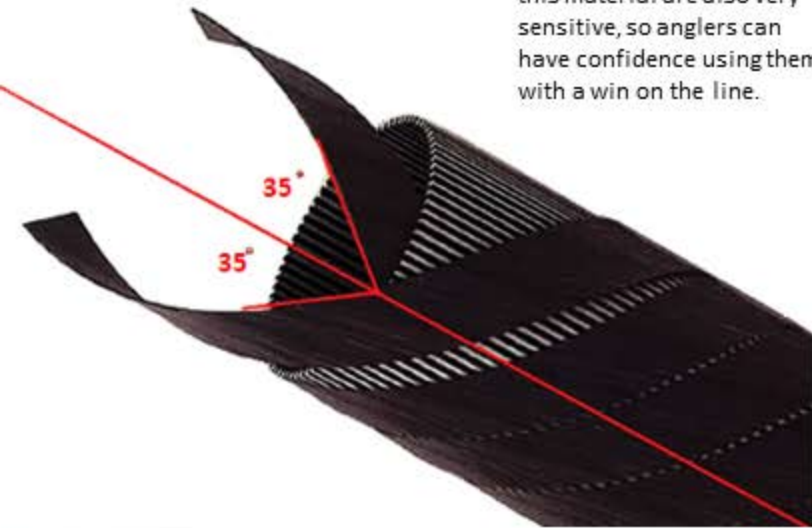

**CARBON COIL TECHNOLOGY**

**RT4 GRAPHITE**

- Carbon Coil Technology is an advanced rod construction process that utilizes a double helix configuration of materials to provide structural reinforcement.

- RT4 Graphite was developed for the avid tournament angler looking for a competitive edge. It utilizes Carbon Coil Technology to reduce weight and improve strength. Rods infused with this material are also very sensitive, so anglers can have confidence using them with a win on the line.

- P-Tec polyfoam grips ensure secure, comfortable performance under any conditions.

- Durable new Pac Bay titanium frame guides further enhance weight reduction.

- Bass Pro Shops patent pending line ID system allows anglers to keep track of and easily identify the line weight used on each rod and reel setup.

- Minimalist reel seats with comfort enhancing soft touch coatings improve sensitivity by maximizing blank exposure.
